

LEED 2009 for New Construction
Credit contributions: 8 points

Materials and Resources

- | | |
|-----------------------|---|
| MR 6
ID 1.1 | <p>Rapidly Renewable Materials, 2.5%
Rapidly Renewable Materials, 5%</p> <p>Our bamboo is harvested within 4 years, easily besting the requirement of 10 years for this credit. Our backing material is cotton, harvested annually.</p> |
| MR 7
ID 1.2 | <p>Certified Wood, 50%
Certified Wood, 95%</p> <p>Our bamboo is FSC-certified.</p> |

Indoor Environmental Quality

- | | |
|---------------|--|
| EQ 4.1 | <p>Low-Emitting Materials, Adhesives & Sealants</p> <p>Our recommended primer and adhesive products comply with the low-emitting VOC limits defined in this standard.</p> |
| EQ 4.2 | <p>Low-Emitting Materials, Paints & Coatings</p> <p>Low-emitting stains and finishes, as prescribed in our instructions, are easily available nationwide at stores such as Sherwin-Williams.</p> |
| EQ 4.4 | <p>Low-Emitting Materials, Composite Wood & Agrifiber Products</p> <p>Our unique wallcovering provides you with wood and grass-covered walls without risking a violation of this standard. No composite wood or agrifiber products are required, removing the risk of non-compliance.</p> |

Innovation and Design Process

- | | |
|---------------|--|
| ID 1.3 | <p>Innovation in Design</p> <p>SR Wood's revolutionary wallcovering product is a greener and safer substitute for traditional paneling. Substantially less energy and material resources are consumed in the manufacturing and transportation of Bamboo Wallcovering.</p> |
